

## NK SALVUS CANTILEVER GATE

**NK Fencing is proud to offer the NK SALVUS CANTILEVER GATE a revolutionary new automated gate system ideal for a variety of customers access control needs, bringing automation within your reach.**

The NK SALVUS CANTILEVER GATE is a heavy duty aluminium automatic sliding gate ideally suited to maximise traffic flow in and out of premises, while simultaneously enhancing overall security. This is achieved through simplifying the gate operation and offering a wide variety of modular access control features such as keypads, intercoms, remote controls and screens.

The NK SALVUS CANTILEVER GATE is a simple and highly effective way of increasing security and controlling traffic egress which can integrate seamlessly into your existing premises and perimeter security systems. Health & Safety is paramount in your premises; the NK SALVUS CANTILEVER GATE helps reduce the risk of injury through eliminating the need to manually handle heavy gates. A major feature of the NK SALVUS CANTILEVER GATE includes safety edges which can automatically stop the gate regardless of its current position.

The NK SALVUS CANTILEVER GATE is a highly efficient and flexible solution for your access control needs, requiring minimal site preparation and offering rapid installation. Our entire range is supported by a highly skilled network of service engineers who will consult with you before, during and after the installation of the NK SALVUS CANTILEVER GATE.

For automated access control within your reach, choose the NK Salvus.

**Where safety and security meet.**
